

Justin DeKock

Summary

he/him/his
I'm a driven individual with 4+ years of professional experience, expecting to graduate with my M.S. in Information Systems after completing my Masters Research project in December 2026. I'm passionate about software development, systems design/architecture, and systems/database administration. I'm an efficient problem-solver with proficiencies in a wide range of programming languages, automation technologies, data manipulation tools, GIS technologies, and more. My professional experience is primarily in automation scripting and database reporting, and my ever-growing portfolio of personal open-source software development projects can be seen on my public Github account.

Skills

Programming Languages

- TypeScript/JavaScript
- Go
- HTML/CSS
- Python
- C/C++

Software/Tools

- Git/Github
- UNIX Command Line
- Docker
- UML/PlantUML

Database

- Oracle (PL/SQL)
- Postgres (PL/pgSQL)
- MS SQL Server (TSQL)
- MongoDB (NO-SQL)

Other Notable Skills

- ArcGIS Maps SDK for JavaScript
 - PostGIS
 - Tableau/PowerBI
 - Alteryx
-

Experience

Saint Louis University, St. Louis, MO | July 2023 - Present

Systems Specialist - Student Financial Services | October 2024 - Present

- Design & develop systems for administering federal and institutional financial aid
- Utilize data manipulation tools like Alteryx and scripting languages like Python and JavaScript to automate processes
- Write SQL reports for high-volume Oracle databases, particularly the Ellucian Banner SIS (student information system) database

- Write scripts (primarily in Python) to generate SQL INSERT and UPDATE statements that automate Banner processes
- Automate survey response collection in Python using the Qualtrics API

Federal Work Study Coordinator | July 2023 - October 2024

- Managed FWS (Federal Work Study) program
- Redesigned FWS community service agreement process in Qualtrics
- Analyzed FWS vs. non-FWS Student Worker data to find opportunities to maximize FWS spending, resulting in an additional ~\$600,000 in funds being spent
- Designed electronic surveys in Qualtrics to digitize paper forms
- Customized Qualtrics surveys using embedded JavaScript to improve survey quality & accessibility

Washington University School of Medicine, St. Louis, MO | June 2022 - July 2023

Planning Assistant - Operations & Facilities Management | June 2022 - July 2023

- Provided project support on the BJCIH Vertical Expansion Project, the Neuroscience Research Building, and the Ambulatory Cancer Building
- Coordinated and documented executive level meetings
- Created reporting materials using the Microsoft Office Suite, Adobe Acrobat, etc.

East West Gateway Council of Governments, St. Louis, MO | Jan. 2022 - June 2022

Urban Planning Intern | Jan. 2022 - June 2022

- Studied urban planning principles, provided support to and observed several local planning projects

Education

M.S. Information Systems

Saint Louis University | 2024-Present

- I expect to complete my M.S. in Information Systems in December 2026, after completing my Masters Research Project.
- Relevant coursework in:
 - Systems Architecture ■ TypeScript/JavaScript ■ Python ■ Database Design/Admin ■ Cyber Security Principles

B.A. Educational Studies

Webster University | 2018-2022

- After completing several fundamental courses as a Computer Science major, I completed my undergraduate education with a degree in Educational Studies.
- Relevant coursework in:
 - C++ ■ Programming Principles ■ Operating Systems ■ Networking Principles

Open Source Projects

jdeko.me: Personal Website | github.com/jdetok/go-api-jdeko.me

- Go ■ TypeScript/JavaScript ■ HTML/CSS ■ Docker ■ Postgres ■ MongoDB ■ Nginx ■ Cloudflare
- Designed REST API to access NBA/WNBA statistics from a Postgres database
- Designed custom logging system that logs HTTP requests to a MongoDB database
- Frontend built using plain HTML/CSS/JavaScript(transpiled from TypeScript)

STL Transit Map: Masters Research Project | github.com/jdetok/stl-transit

- TypeScript/JavaScript ■ ESRI ArcGIS Maps SDK for JavaScript ■ PostGIS ■ Go ■ HTML/CSS ■ Docker ■ Postgres
- Designed an open source and locally-hosted PostGIS/Go backend for serving GIS data to a TypeScript frontend using the ArcGIS Maps SDK

- Built an accessible and intuitive frontend utilizing ArcGIS web components and ESRI Calcite Design System components

[This Resume!](#): Custom resume built with Hugo | github.com/jdetok/resume

- I built and maintain this resume using Hugo - a static website generator built with Go

[NBA/WNBA Statistics Database](#): Supports Personal Website | github.com/jdetok/bball-etl-cli

■ Go ■ Docker ■ Postgres ■ PL/pgSQL

- Designed a fully normalized relational database to store NBA/WNBA stats
- Calls official NBA API, cleans/restructures the returned JSON, inserts into database

[GoPuml](#): Personal Project | github.com/jdetok/gopuml

■ Go ■ PlantUML (Puml) ■ Regex

- Command line tool that scans a Go codebase for specific regex patterns, maps Go syntax to Plantuml syntax, and outputs a valid Plantuml script that renders as a UML class diagram
-
